

MOBILE SAWS

WOOD INDUSTRY

MOBILE SAWS

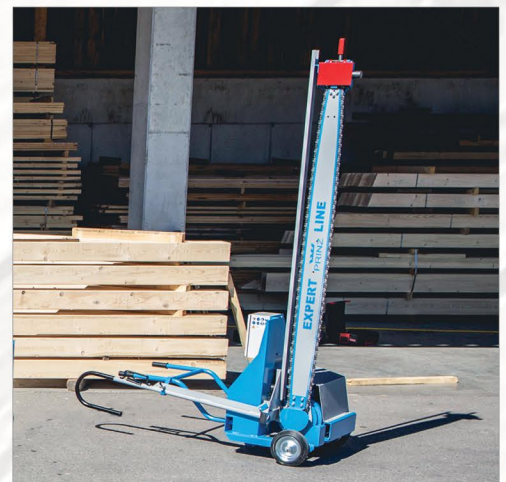

ECOSTAR

Mobile, electric chainsaw ECOSTAR (7,5 kW) for cutting packages and round wood. The basic model among mobile saws, which enables accurate (+/- 4 mm) cutting of the material without the need of large investment outlays. Optimal price-performance ratio.

TECHNICAL DATA

ergonomic handle for easy raising/lowering of long guide bars • wide front bumper enabling accurate, perpendicular positioning of the machine in relation to the material • 5l oil tank for long operation • easy, tool-free saw chain replacement • fast amortization of the machine thanks to low purchase and operating costs • for packages up to max. 130x130 cm (W x H)

PROFICUT light / PROFICUT strong

Mobile cross-cut chainsaws PROFICUT light (7,5 kW) and PROFICUT strong (11 kW, reinforced construction) are further development of ECOSTAR, in addition they can be delivered with a frame for package positioning.

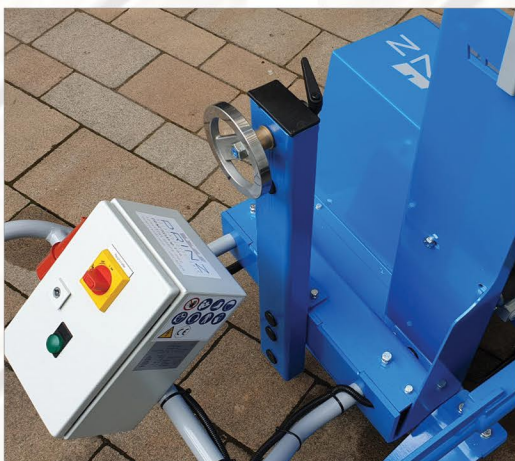

TECHNICAL DATA

two stabilizers to increase cutting accuracy • wide front bumper enabling accurate, perpendicular positioning of the machine in relation to the material - 75cm c-beams

- automatic lubrication of the cutting unit with oil given directly to cut material side
- cast iron rail head with tension and absorbing system • for packages up to max. 130x130 cm (W x H) using PROFICUT light and max. 170x170 cm using PROFICUT strong

Footrest

Side shift mechanism (optional)

Laser (optional)

TWIN-L

The PROFICUT saws can be delivered with a frame for package positioning, which increases accuracy and cutting performance.

TECHNICAL DATA

saw is positioned manually on desired position • construction enables accurate, perpendicular cuts • saw remains in the same position in relation to the package • blocking the saw feed before cutting • vertical profiles for exact positioning of the package in relation to the cutting unit

HIGHEST QUALITY ACCESSORIES

Using PRINZ accessories, operation and maintenance of machines is carried out efficiently and smoothly. In addition, PRINZ provides service of cutting unit parts for cross-cut stations and roundwood sorting/transporting carriages, as well as precise saw chain sharpening and professional regeneration of guide bars.

✓ **SCRAPER AND CHIPPER SAW CHAINS**

✓ **GUIDE BARS - MANY LENGTHS AND TYPES**

✓ **PRINZ SAW CHAIN OIL**

✓ **SAW CHAIN SHARPENING MACHINES**

✓ **RIVETING AND UNRIVETING OF CHAINS**

✓ **GUIDE BAR REGENERATION**

Errors and misprints excepted.
