SAWS FOR PLASTIC

PLASTIC

PRINZ chain saws to resize plastic pipes and plastic semi-finished products

PRINZ chain saws to cut plastic are available in different configurations: mobile saws are the perfect entry model for an easy cutting of pipes and other formed parts. Parallel guided cutting equipments makes it also possible to handle pipes up to 250cm diameter. The „Plasticut“, a saw chain especially developed for these applications, leaves a smooth and plane cut finish, either for solid or hollow pipes.

Characteristics:

- manual, electric or hydraulic feed for cut
- mobile or stationary saw
- different cutting geometries available

Options:

- cooling system for cutting equipment
- chain lubrication
- chip removal
- stable pipe grip systems

Benefits:

- high cutting speed
- square straight-line cut
- excellent finish and accuracy of cut
- quick and easy chain replacement
- also suitable for large diameters
- all from one single source
- robust and durable
